

UPMAP MINTAKE DUCATI - ENG

UpMap SYSTEM

The UpMap suite, made up of the UpMap application and the T800+ interface device, is the first system that allows you to customize the way you live your passion

Free the soul of your motorcycle with the category of MINTAKE products developed and designed by UpMap

UpMap Kit Mintake Ducati

From the experience of UpMap's R&D the air-intake kits called MIntake are born.

After installing the MIntake KIT with Venturi profile air inlet you will get an increase in air flow rate and an increase in speed in the duct; which results in a reduction of the ON OFF effect at low speeds, a greater power and torque to the engine.

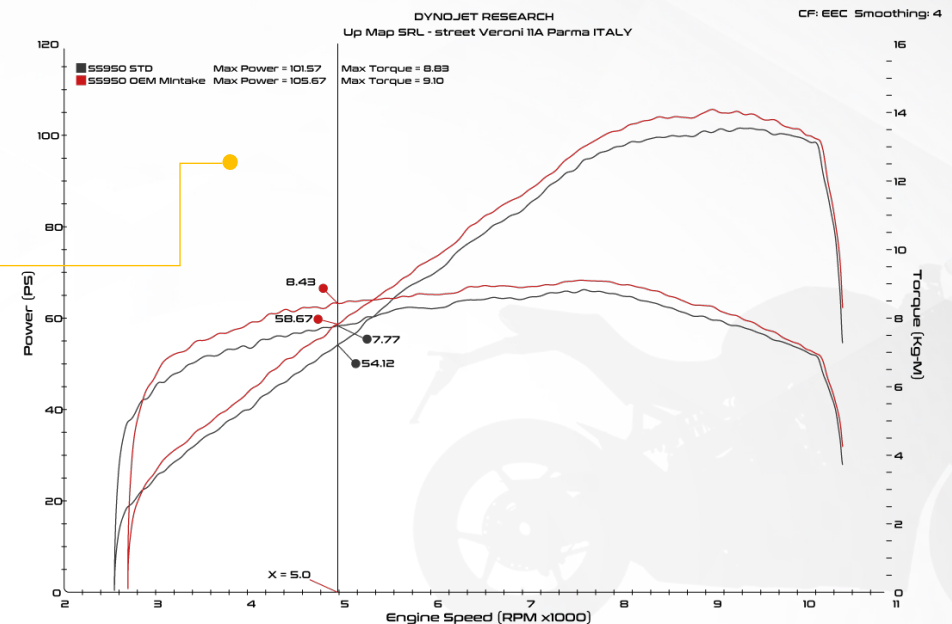

The dyno graph shows the real potential of the MIntake kit, the test was performed with the same exhaust system configuration.

POWER

+4,1cv and 0,27Kg-M

Increase in power and torque after installation of the MIntake kit

UPMAP MINTAKE DUCATI

name

UP230608

product code

UpMap Mintake for DUCATI
SUPERSPORT 939 - SUPERSPORT 950 - MONSTER 821 - MONSTER 1200

description

PACKAGE CONTENTS

- Filter holder: UpMap MIntake SuperSport 939 and 950, Monster 821 and 1200 (part number: UP230608)
- Fixing screws

Please note: the air filter is not included with the purchase of the Mintake kit.

COMPATIBILITY

- Ducati SuperSport 939 base and S version - m.y. 2017-2020
- Ducati SuperSport 950 base and S version - m.y. 2021-2023
- Monster 821 all version - m.y. 2014-2020
- Monster 1200 base, S and R version - m.y. 2014-2021

Example image: the air filter is not sold in the Mintake Kit
