UpMap Kit Mintake

From the experience of UpMap's R&D are born the air-intake kits called MIntake. After installation, the MIntake KIT increase the air flow and the air speed intake duct; this allows into more power and torque to the engine.

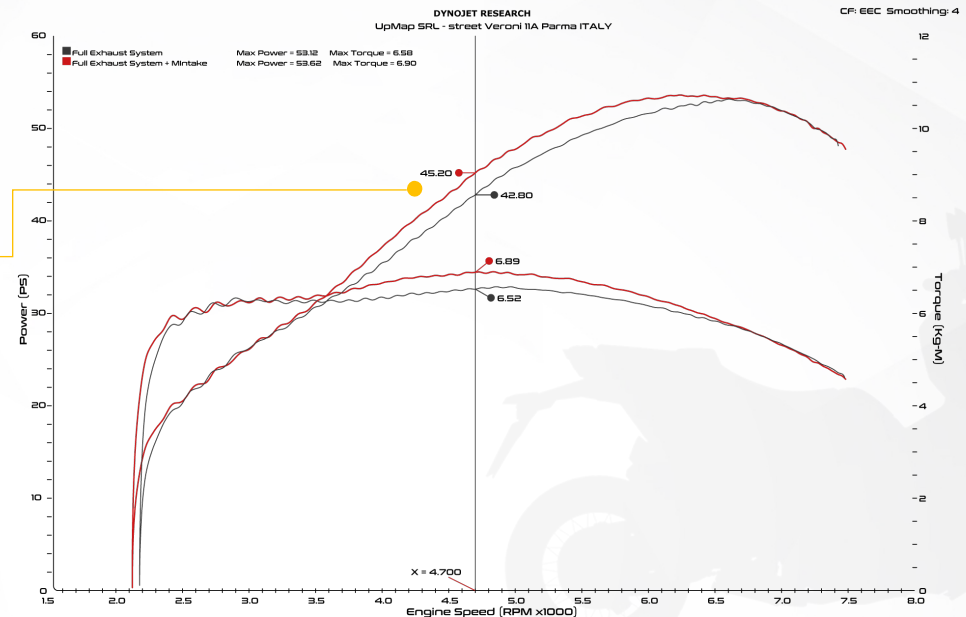

The dyno graph shows the real potential of the MIntake kit, the test was performed with the same exhaust system configuration.

POWER

+2,4cv e 0,4Kg-M

Increase in power and torque after installation of the MIntake kit
